4.2 User-Interaction – Sign Out

Test Description: This test is to verify that the user can successfully sign out of the web application while navigating on the About Us View. To perform this test, User will need to click on the 'Sign Out' button Figure 4: Box 2.

Tester: Andrew Hang

Recorder: An Lam

Date: 10/28/2019

Specify Test input: N/A

Expected output: User successfully logs out from Application Table View. Figure 4: Box 2

☒ Verified
☐ Not Verified

4.3 User-Interaction – About Us

Test Description: This test is to verify that the user can successfully load the web application's About Us component while navigating on the Application Table View. To perform this test, user will need to click on the 'About Us' button in Figure 4: Box 3.

Tester: Phu Ho

Recorder: An Lam

Date: 10/28/2019

Specify Test input: N/A

Expected output: About Us view loads successfully. Figure 4: Box 3

☒ Verified
☐ Not Verified

4.4 User-Interaction – Add User

Test Description: This test is to verify that the user can successfully add a new user to the Application table. To perform this test, user select the 'Add User' button Figure 4: Box 4. Fill out the required information from the pop-up menu. New application should be added to MongoDB and Application Table should be refreshed to display most up to date information.

Tester: Jay Yang
Recorder: An Lam
Date: 10/28/2019

Specify Test input: Name: jim, E-Mail: jones@fakeEmail.vendor

Expected output: MongoDB is updated with new applicant information and Application Table is refreshed with most up to date applications.

☒ Verified
☐ Not Verified

4.5 User-Interaction – Export to CSV

Test Description: This test is to verify that the user can successfully export the current Application Table to CSV file and allow the admin to download it locally. To perform this test, user should select the 'Export to CSV' button in Figure 4: Box 5 and download the CSV to their local computer.

Tester: Matthew Goebel
Recorder: An Lam
Date: 11/04/2019

Specify Test input: N/A

Expected output: User can export current Application Table to CSV and download it locally to PC.

☒ Verified
☐ Not Verified

4.6 User-Interaction – Filter

Test Description: This test is to verify that the user can successfully filter the Application Table by text. To perform this test, user select the text field illustrated in Figure 4: Box 5. Input a text to filter out an applicant.

Tester: Andrew Hang
Recorder: An Lam

Date: 11/04/2019

Specify Test input: Name: jim, E-Mail: jones@fakeEmail.vendor

Expected output: Applicant jim is filtered out on the Application table.

☒ Verified

☐ Not Verified

4.7 User-Interaction – Sort

Test Description: This test is to verify that the user can successfully sort the Application table by category. To perform this test, user should select the one of the headings in Figure 4: Box 7. Select a category to sort by.

Tester: An Lam

Recorder: An Lam

Date: 11/04/2019

Specify Test input: N/A

Expected output: User is able to sort by category selected.

☒ Verified

☐ Not Verified

4.8 User-Interaction – Edit

Test Description: This test is to verify that the user can successfully edit an applicant that is displayed on the Application table. To perform this test, user should select the hamburger menu as illustrated in Figure 4: Box 8. A pop-up menu will display and allow the user to edit Applicant information. Once finished editing, user can accept the changes.

Tester: Jay Yang

Recorder: An Lam

Date: 11/11/2019

Specify Test input: Name: jim, E-Mail: jones@fakeEmail.vendor

Expected output: User is able to edit an existing applicant.

☒ Verified

☐ Not Verified

4.9 User-Interaction – Email

Test Description: This test is to verify that the user can successfully send an acceptance email to an applicant. To perform this test, user should select the mail button next to an applicant as illustrated in Figure 4: Box 9.

Tester: Andrew Hang

Recorder: An Lam

Date: 11/11/2019

Specify Test input: N/A

Expected output: User is able to send out an email to an existing applicant.

☒ Verified
☐ Not Verified

4.10 User-Interaction – Items per page

Test Description: This test is to verify that the user is able to change the items per page for the Application table. To perform this test, user should select the number of items per page desired.

Tester: Phu Ho

Recorder: An Lam

Date: 11/18/2019

Specify Test input: N/A

Expected output: User is able change the number of items per page.

☒ Verified
☐ Not Verified

4.11 User-Interaction – Page navigation

Test Description: This test is to verify that the user can successfully navigate the pages on the Application table. To perform this test, user should select the forward and back button as illustrated in Figure 4: Box 10.

Tester: Phu Ho

Recorder: An Lam

Date: 11/18/2019

Specify Test input: N/A

Expected output: User is able to navigate the pages on the Application table.
